## EXPERIENCE

### Freelance Full Stack Developer

#### Self-Employed

 2025 – Present  Remote

- Developed **PennyPilot** – an expense tracker app using the MERN stack, featuring user authentication, transaction history, and intuitive UI.  
*Live at:* pennypilot-jlfq.onrender.com
- Built an education dashboard using Next.js to render content dynamically from Dignity Education APIs (Board, Class, Subject, Topic).

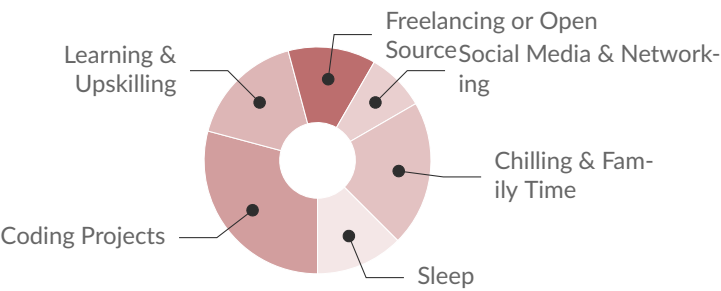

### Open Source Contributor

#### Personal Projects

 2025 – Present  Remote

- Created **Coinbazaar** – a React.js-based cryptocurrency dashboard that fetches and displays real-time market data from public APIs.  
*Live at:* nileshstack.github.io/Coin-Bazaar
- Built a full-stack **Blog Platform** using Next.js and Node.js that automatically sends welcome emails upon user signup via integrated mailing services.

## A DAY OF MY LIFE

# MY LIFE PHILOSOPHY

“Consistency beats talent when talent doesn’t work consistently.”

## MOST PROUD OF

- **Built PennyPilot Expense Tracker**  
A full-featured MERN stack app to manage daily expenses with clean UI and secure user authentication.
- **Automated Blog App with Email Service**  
Developed a full-stack blog using Next.js and Node.js that auto-sends welcome emails to new users.
- **Coinbazaar - Crypto Dashboard**  
Created a crypto analytics dashboard using React.js and APIs, displaying real-time market data.

## STRENGTHS

- Problem Solver

Team Player

Quick Learner

Detail-Oriented
